

Mykyta Shcherbyna

Full-Stack Web Developer

@ mshcherbyna@icloud.com t.me/mshcherbyna99 @mshcherbyna99 mshcherbyna99 Gdansk, Poland

Results-driven Full-Stack Web Developer with 5 years building high-performance, scalable applications using or based on the PHP, JavaScript, Node.js and SQL technologies. Led optimizations that boosted page load speeds by 30-40% and retention via SOLID/DRY principles and MVC architecture. Eager to innovate in collaborative teams, delivering efficient solutions for your projects.

Education

2020 - 2021 Kryvyi Rih, Ukraine
Master's Degree in Software Engineering

2016 - 2020 Kryvyi Rih, Ukraine
Bachelory Degree in Software Engineering

Skills/Tools

• PHP • JavaScript • TypeScript • MySQL • Node.js • Laravel • Yii2 • Angular • Vue • React • Percona • AWS • Docker • Git • Subversion (SVN) • CMake • HTML/CSS • Bootstrap • jQuery • Jenkins • GitHub Actions • BitBucket Pipelines • BugSnag • PHPUnit • Python • Java • OpenAI API • Stripe • Image-gen AI models (Stable Diffusion, Flux.1)

Achievements/Certifications

ESOL International (Communicator B2)
Listening, Reading, Writing

Experience

Full-Stack Web Developer
SDA Company
📅 2025 Jan. — present 📍 Remote

Backend Developer
Preventa
📅 2024 Sep. — 2025 Jan. 📍 Remote

- Implemented key functionalities using microservices
- Designed and implemented RESTful APIs to facilitate data exchange between backend and frontend servers.
- Reduced backend performance issues by reviewing integration and codebase

Full-Stack Web Developer
Under NDA
📅 2022 Nov. — 2024 Sep. 📍 Remote

- Led the enhancement of a high-traffic PHP application, resulting in improvement in page load times and increase in user retention through reworked and optimized MVC architecture and advanced Object-Oriented Programming (OOP) techniques
- Developed and implemented new features that increased application scalability, utilizing SOLID and DRY design principles
- Helped with the integration of Docker for containerization, improving deployment efficiency
- Optimized database performance and management using MySQL, which reduced query response time in multiple times
- Enhanced frontend functionalities using JavaScript with jQuery and Bootstrap

Full-Stack Web Developer
Webstick
📅 2020 Aug. — 2022 Nov. 📍 Kryvyi Rih, Ukraine

- Played a key role in developing and deploying multiple high-quality web applications, resulting in increase in client satisfaction scores
- Leveraged Laravel and Yii2 frameworks to build robust backend systems, improving system reliability
- Implemented modern JavaScript practices with Vue, enhancing the user interface and experience
- Managed version control through Git and Subversion (SVN), leading improvement in codebase consistency and project collaboration
- Streamlined the development process by using Open Server, reducing testing time and improving overall development efficiency
